

Green Procurement Policy

Objective

Preformed Windings Limited employs a green procurement policy on all plant, equipment and tools used in its manufacturing and support processes in line with its Energy Policy aims and objectives.

Our commitment to managing carbon dioxide *emissions* is integrated in our overall commitment of pollution prevention and our aims stated in our Environmental Policy and ISO 14001: 2004 Environmental management system.

New and replacement

Where possible all new and replacement plant, equipment and tools procured for use must have lower energy consumption values than those being replaced.

Benefits

The benefits obtained are to be logged and monitored to allow demonstration to the carbon reduction in line with the group objectives.

Capital expenditure

In line with the capital expenditure procedure all new equipment must have a capital expenditure application and where possible the carbon reduction section must be completed.
